ELECTRIC

Electric's reputation for being one of the most forward-thinking names in eyewear is well earned. The brand has designed and developed products with some of the world's top athletes and personalities.

A commitment to style-driven, purpose-built eyewear is a key design philosophy that has resulted in two decades of innovation.

Twenty two years in, the passion and energy are unparalleled, and the brand remains unapologetically — Electric.

MADE IN ITALY

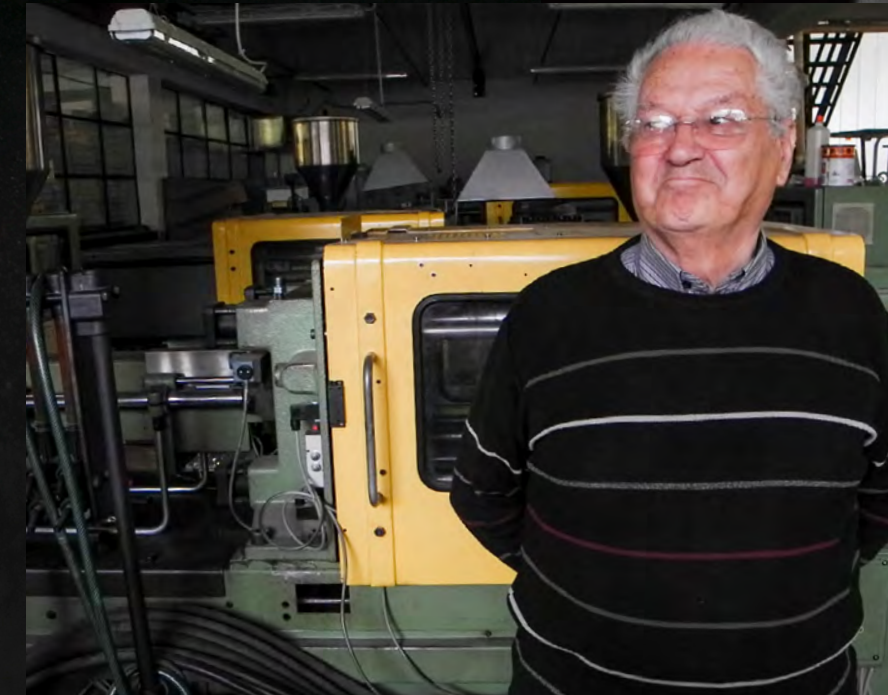

Italian craftsmanship has set the global standard for luxury product engineering. Meticulous attention to detail, first choice materials, and high standard processes have placed Italian craftsmanship at the pinnacle of sunglass manufacturing.

Steeped in history and tradition, our factories embody a place where old-world artistry meets cutting-edge technology.

We build our eyewear in Italy because we believe in producing quality products to stand the test of time.

HERITAGE | TRADITION | QUALITY

LIFETIME WARRANTY

Electric manufactures only in independent, small family-owned, Italian based factories, guaranteeing that each frame is crafted with generational expertise and tested at the highest standards possible. Each frame undergoes multiple quality control checkpoints throughout its production cycle. We're so confident in our product we offer a lifetime warranty.

Electric lenses are infused with synthetic Melanin to protect against 98% of harmful blue light, enhance your visual clarity, and provide a true color perception with a relaxed feeling for your eyes.

MAXIMUM COMFORT
SUPERIOR DEFINITION
ENHANCED PROTECTION

Electric is the only brand that chooses Melanin-Infused Lenses for all sunglasses. We've created the perfect combination of performance and protection.

MELANIN

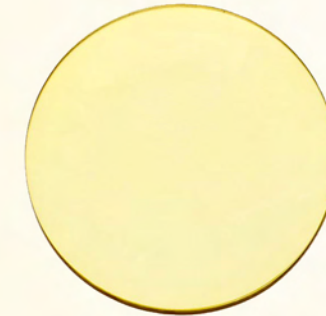

Melanin is a natural pigment that is found throughout the human body and every single living organism on this planet. Its role is to protect us against sunlight damage by filtering UV and harmful blue light.

Melanin is the best natural defense against the harmful effects of the sun. This natural system of protection inspires our unique Melanin-Infused Lenses. We provide a shield against UV and harmful violet-blue light (HEV) that is equivalent to applying SPF 140 to your skin.

ELECTRIC

Melanin-Infused
base lens

We go beyond simply shielding your eyes from harmful UV.

All sunglass lenses reduce to some extent the light entering the eyes. However, only Electric's Melanin-Infused Lenses take out the bulk of the HEV light while preserving color integrity, improving definition, and protecting the eye from the long-term effects of damage due to HEV light hitting the retina.

100% UV PROTECTION

98% HEV (BLUE LIGHT) PROTECTION

PROTECTS YOUR EYES AND THE SKIN AROUND YOUR EYES FROM SUN DAMAGE

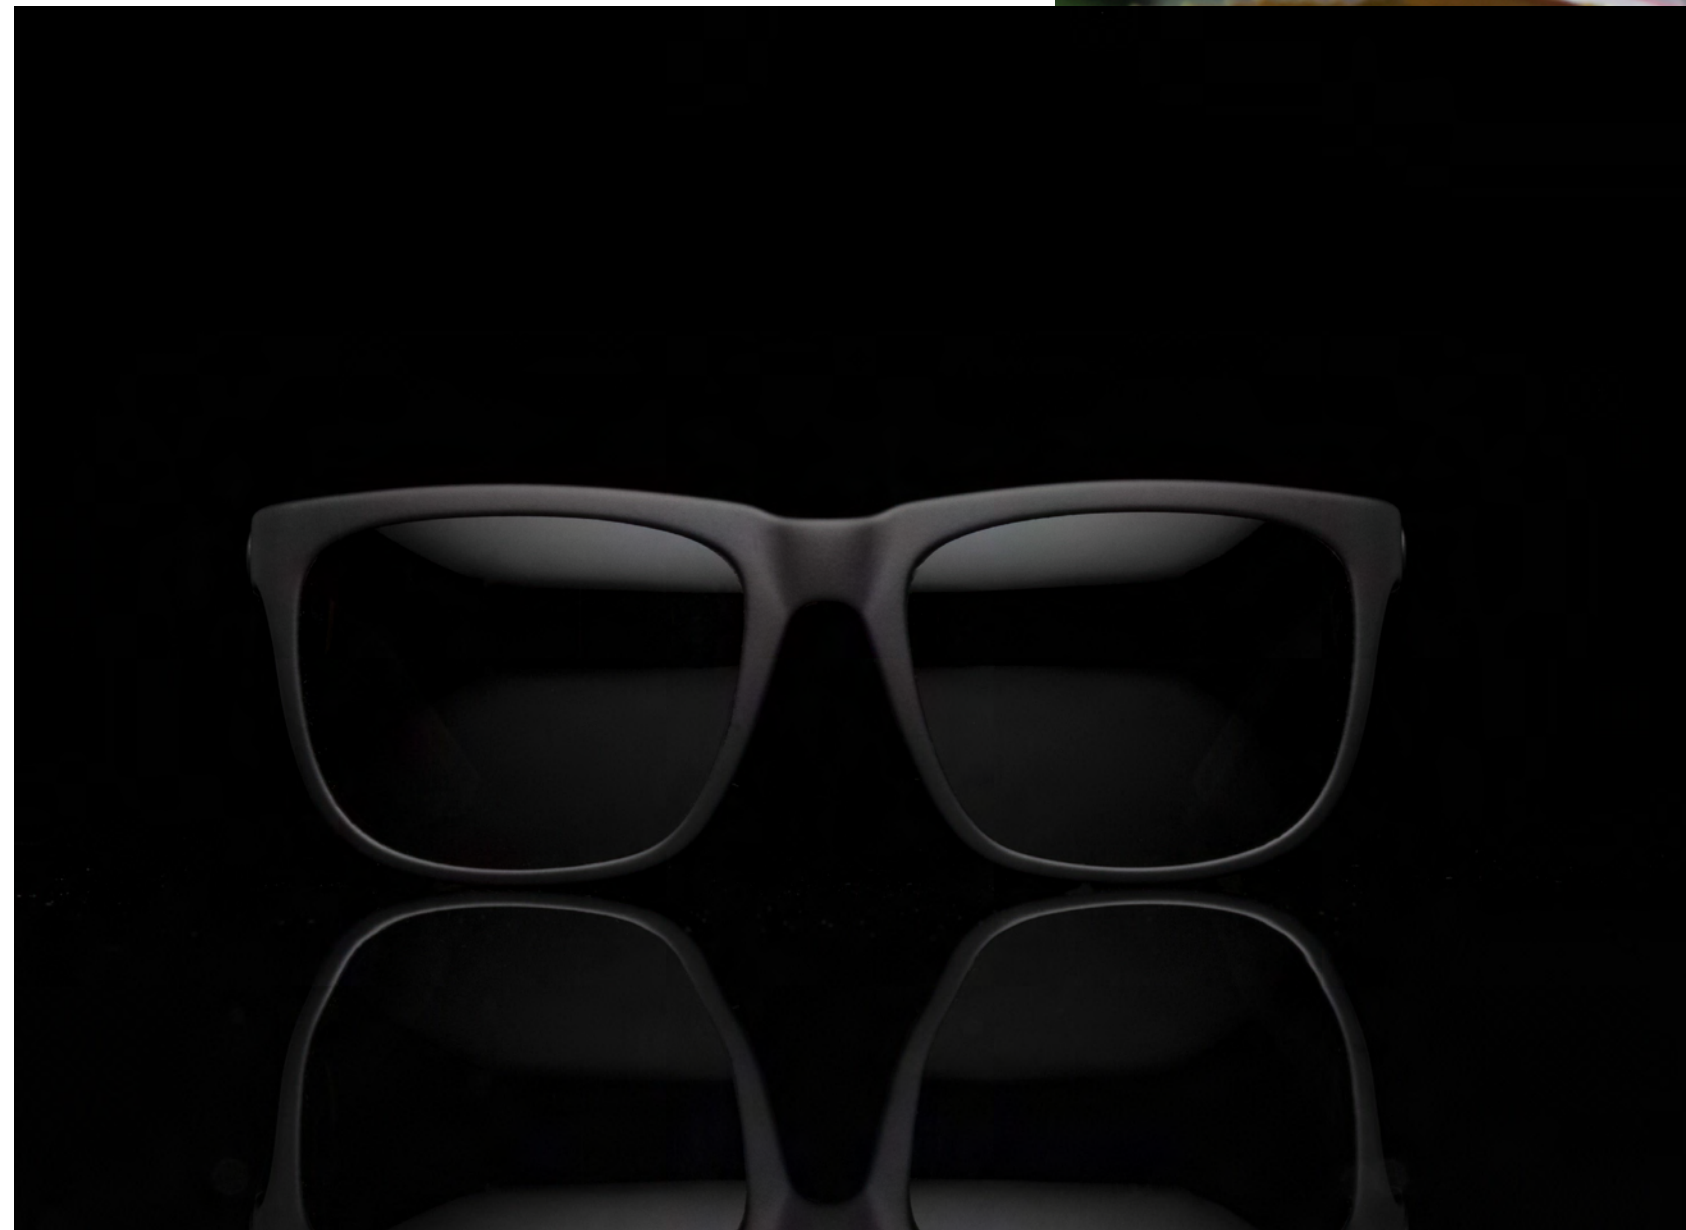

IMPROVES CLARITY AND MAINTAINS NATURAL COLOR PERCEPTION

SUSTAINABILITY

We are putting a new emphasis on improving our environmental impact. We are investing in new processes and more sustainable material stories. It's not perfect, but it is an improvement on where we've been. This effort is a long-term commitment, and our goal is to get better here every season.

BIO RESIN

Eco-friendly injected frames made from bio-based materials from renewable raw materials that have excellent structural properties and allow a proven contribution towards reduction of environmental impact.

BIO ACETATE

M49 Bio Acetate by Mazzucchelli is composed of cellulose acetate and a plasticizer of vegetable origin. The resulting formula is mostly composed of materials from renewable sources.

**M49 IS BOTH BIO-BASED AND BIODEGRADABLE
FEATURES MATERIALS OF NATURAL AND RENEWABLE ORIGIN
ALL M49 BIO ACETATE FRAMES ARE HAND-CRAFTED IN ITALY
FEATURED IN ALL PREMIUM PRODUCTS**

Mazzucchelli, one family, 6 generations sharing the same mission and values: excellence in innovation and quality with a focus on tradition and craftsmanship. The cultural roots of Mazzucchelli stand in the company determination to always be a pioneer, in the vocation to research, technical and aesthetical innovation and in the experience and ability to collaborate with some of the best companies in the world.

Our Polarized filters are infused into the lens, not coated, for long term durability and performance. They offer the best protection and clarity possible.

POLARIZED LENSES

Electric's melanin-infused polarized lenses block 99% of debilitating glare from the water's surface. They also reduce HEV blue light by 98%, provide superior color contrast and reduce eye fatigue.

POLARIZED CATEGORIES

- 100% UV PROTECTION
- 99% EFFECTIVE GLARE REDUCTION
- 98% HEV (BLUE LIGHT) PROTECTION
- PROTECTS YOUR EYES, AND THE SKIN AROUND YOUR EYES FROM SUN DAMAGE
- IMPROVES CLARITY AND MAINTAINS NATURAL COLOR PERCEPTION

THE PORTOFINO

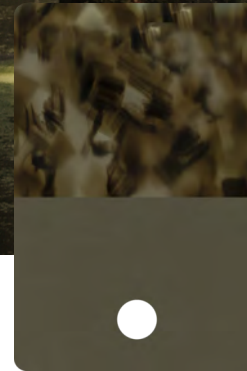

NEW DESIGNS & MATERIALS

The 2022 collection features some bold new frames in all eyewear categories. All new frames in the Everyday category are now proudly manufactured from Bio Resin, while the entire premium group is produced from M49 Bio Acetate.
